APPROVED BACKFLOW PREVENTION ASSEMBLY TESTERS**

CWS requires all backflow prevention assembly testing for our customers be performed by an approved tester. This is a list of companies who have employees that have met the minimum requirements to be an approved tester. Minimum requirements are that they are certified by SCDHEC and they attend an orientation class to learn specific CWS requirements and procedures for testing and reporting. These procedures are standard and every tester is expected to follow those standards. These companies are private contractors and they define their services and set their prices as they choose. It is the customer's responsibility to choose and hire a tester from this list that suits their needs.
